

Solon Marquis Office Building

Sidley Precast provided the architectural precast on the Solon Marquis Office Building in Solon, Ohio.

The Marquis Office Building is a new 40,000 square foot, two story office building located in the heart of Solon at the corner of Solon and Aurora Roads. This building combines a white and black granite aggregate precast panel with architectural ribbing, reveals and insets in combination with a blue spandrel glass with chrome accents designed by architect Don Plunkett of Plunkett and Associates. The office building features over 12,000 square feet of precast concrete components including ribbed spandrels, parapet panels, column and stair panels.
